Information Warfare: My definition in 1993

- A conflict where the use of information and information systems are used to compromise, corrupt or destroy the information and information systems of one's adversary.
- The Migration of Conflict To Commercial: Convergence
 - Replaces Conventional Warfare: Military pre-eminence outmoded?
 - No longer necessary for a military conflict
 - A new dimension without bombs and bullets
 - Prelude to Conflict /Lethality Reduction
 - The world is moving so fast these days that the person who says it can't be done is being interrupted or passed by the person who is doing it. I hope to have put myself in that position.
 - Declassify the Threat
- How does any country defend itself against an attack?
Electronic Pearl Harbor

Governments Need to Understand

- IW Can Be Waged By Anyone
- Open Source Intelligence
 - No More Secrets
- What's available to me/us, is available to them
- Commercial Infrastructure weak, unsecure.
 - Military requires commercial infrastructure
 - Technology Proliferation
- Borders are meaningless
- A lot more enemies than ever before
- Military can be effectively bypassed
- Enemies can be invisible and unidentified
- National Convergence
 - Military and Civilian Interests

New World Order of Economic Competitiveness

- Three Spheres of influence with differing approaches to capitalism
 - North America
 - Europe
 - Far East (“Business in War”)
- New targets abound
 - Third World and Agrarian/early industrial age adversaries

Computers Everywhere and the Global Network

- 3 Spheres of Capitalism
 - Economic Competitors replace Military
 - Military Allies = Commercial Competition
- Econo-technical Infrastructure is the target
 - Finance: Corp/Personal -
 - Transportation
 - Power Distribution
 - Communications
 - Complexity Breeds Vulnerability - ergo - that which gives us the advantage also is our greatest vulnerability
- Commercial Sector is the Battlefield

Defensive Policy

- For decades we based have our defensive posture upon our adversaries capabilities, not their presumed intentions.
 - I suggest that we currently have no policy to defend the US against a concerted enemy Cyber-attack
 - Corporations need new definitions and charters.
- All of our economies and domestic econo-technical infrastructure is a strategic national security asset worthy of protection.
 - Should we sacrifice it for the sake of military secrets?

The 3 Classes of Information Warfare

Class I

Class II

Class III

West Hartford, CT
Vermont Town
Hackers Attacked My Family
How Can We Trust the #'s?

Espionage Makes Sense
Low \$ to Market Entry
Few Penalties
Hard to Catch

Infrastructure Attacks
Reliance/Dependence
Bypass Military
Strike at the Population

PsyOps
Binary Schizophrenia
Digital Addiction
Approximation Anxiety

Hitachi vs. IBM
Fuji vs. Kodak
Borland vs. Semantech

Communications
Financial & Networks
Transportation
Power

Targets:
Individuals
Profiles
Entire Populations

Confidentiality
"Keeping Secrets a Secret"
Integrity
Modification of Information

Denial of Service
Internet
Physical Backbone
Magnetic Weapons

Information Weapons Goals: same for THEM as for US

■ Goal dependent

- Anonymous
- Invisible
- Passive
- Insidious
- Effective
- Available
- Inexpensive

■ Attack the Fundamentals

- Integrity
- Confidentiality
- Denial of Service (Availability)

Weapons for the Information Warrior:

PsyOps in Cyberspace

- Manipulate the images - sounds - ideas
 - Perception Management
 - ie, Somalia
 - New Sarnoff Tools
- Data Bankers
- Hacking
- Public Records
- Social Engineering
- Media
- Attack the Social Malaises of the population

Anonymous Financial Transactions

- Criminal Central
- Use Tools of Today
- Electronic Bank
- No Names
- Sender/Receiver
 - Know each other
 - Exchange Keys
- “Bank” commission
 - Establishes Trust

Soft Weapons for the Information Warrior

- Malicious Software -
 - Bots - Viruses - Trojan Horses
 - Modified Applications for military offense
- Software is inherently error-prone - Goedel
 - Bank of New York
 - Chicago Bank
- Exploit the weaknesses
 - Technical
 - People

Malicious Hardware - Chipping

- Import: How do we know it/they will operate as advertised?
 - Keyboard, BIOS,
 - Already happening
 - Iraqi Virus Hoax
 - Pentium debacle”
- The only difference between a programming error and malicious software is intent!

Hacking

- Anonymity - Amateur or Professional Hacking
- DISA - 1/399 MI 1/1000
- “Hackers are a national resource to be cultivated, not persecuted.”
 - Netscape - Three Times in Three Months
- Hacking as National Resource
 - Amoral Sociopathic Scum?
 - Early Warning Radar System for Cyberspace?
- Counter-Culture of the 1990's; Remember the 60's!
- Do they have a place in national security?

Sniffing the Net

- Interception
- Eavesdropping
- Internet
- PSN's
- Voice
- Cellular
- FAX
- Satellite
- Buy/Acquire the tools for free (The Internet)

Cellular Hacking

(C) 1996 Winn Schwartau and Interpact, Inc.

Electromagnetic Eavesdropping

- Tempest Busting Once a secret
 - Van Eck Papers 1985,
 - BBC 1989 - Moeller 1990 - Geraldo 1991 - No. CA Chemical Co. 1990 - Chemical Bank 1993
- Power Lines, Ground Signals
- Home Brew for less than \$50

Why worry about Denial of Service?

- Confidentiality and Integrity Solved
 - Virus and WORM Events
- Tech based orgs: comm and mil
 - Soft kill
 - Civilian Government : Unclassified Military
- Banks - Retail Presence <50% in 6 years: Prime Victim
 - Apply to Future
- Double Whammy - World Trade Center - 1993 : No-name Storm of 1993
- “We have the Acts of God thing down. What about the Acts of Man?”

```
document.Bomber.javascript_mailBomber_says.value = ""; } // End of making our code -->
```

This is a fully **FUNCTIONAL** harrassment tool. Use this at your own risk. Many system administrators find email bombing **VERY ANNOYING** (*but don't let me discourage you*).

This works *most* of the time but like all code there is plenty of room for error so I don't promise any thing.

WARNING

This only works with Netscape 2.0 not 2.1 or 3.0 sorry!

don't forget to configure Netscape to your mailhost!!

User to Harrass (*user@host*):

How many email bombs would you like?

Subject:

Your Terrorist Demands:

The Physical Transport Layer

- Velociraptor
- Comm
- Banking
- Backhoes
- Collapse
 - China
 - NY => Israel

A Web of Power Lines Under Stress

A huge grid of transmission lines in the Western United States that power as needed between utility companies. The blackouts that occurred sporadically around the grid on Aug. 10 began when a 600,000-volt line in northern Oregon known as the Big Eddy sagged in the heat and short-circuited. Within an hour, a main power artery known as the Pacific Inter-

The Western Power Grid: Part of the Critical Infrastructure

Large Scale DOS Events of Note

- Newark Airport - Power and backup power in same conduits
 - 24 Hour collapse & world-wide
- Air Traffic Controls
 - New York Airports -All 3 closed by fire in phone switch
 - 23 major events in 1995
- Telephone Companies
 - 1990, 1991
- Alleged Financial Attacks with stolen US weapons: 41 in Europe and US

Nuclear Weapons of the Information Age

- Highly Classified - DEW
- HERF Guns - High Energy Radio Frequency
- EPC - Electromagnetic Pulse Cannons
- EMP/T Bombs - Electromagnetic Pulse Transformer Bombs
- HPM -High Power Microwave
- Congressional Committee who had never heard of these weapons.
 - Gulf War Use
 - HERO - Above air non nuclear - attack mil weapons with electronic vulnerability

Military HPM/EMP >10-100 GWatt

Figure 1.3 EMP and HPM

U.S. Military EMP: Cruise Missile/HA Bomb

Mk.84 900 kg 3.84 m x 0.46 m dia

(C) 1996 Carlo Kopp

HIGH POWER MICROWAVE E-BOMB - GENERAL ARRANGMENT MK.84 PACKAGING
WARHEAD USING VIRICATOR AND 2 STAGE FLUX COMPRESSION GENERATOR

FIG.6 HPM E-BOMB WARHEAD (MK.84 FORM FACTOR)

(C) 1996 Winn Schwartz and Interpact, Inc.

Home Made
HERF/EMP
Device
20MWatts
100 Ft. Soft Kill
Range

National Information Policy

- Electronic Civil Defense
- Info as a Third Wave Asset and projection of power
- A Constitution for Cyberspace
- Create International Cyber-Borders?
- Federal/State Cyber-Borders?
- Information As Strategic Asset
- Should We Spy On the World?

National Solutions

- Acceptance of responsibility
- Argue/Lobby for smart legislation
- Declassify the Threat
- Get Commercial Help
 - Training/Awareness
- Reconsider old jurisdictional issues
 - No borders in Cyberspace

Electronic Bill of Rights

- Own Your Own Name
 - And associated information
- Organizations Must Protect Your Name and Info
- Notification of data
 - Right to Access
 - Right to Contest
 - Right to Remove
- New Gov't Classification
- No Local Ordinances
 - TN vs. CA Porno Case

What constitutes an attack?

- Hussein against
 - Attacks a Mil base in Europe or US
 - Blows up Statue of Liberty
 - Blows up a sports stadium (no loss of life)
 - Steals \$267 from CitiBank
- What are proper responses?
- Who matters?
- Who decides?
- Where is the policy and leadership?

Closing

■ New Paradigms

- Is the economy a strategic asset of any country?
- Do countries want to remain globally competitive?

■ The Future has to Happen

- So, do we want to adapt new thinking and understand new weapons to reflect the new realities of the 21st. century?
- Chinese Proverb: If we don't change direction, we'll end up where we're going.
